

Vožnja električnog vozila iz rent-a-cara u Norveškoj, ne samo da je jednostavna, nego i pruža jedinstveno iskustvo. Prilikom najma automobila se ne moramo za ništa pobrinuti, osim za besplatno instaliranje app-a na našem mobilnom telefonu. Za sve ostalo se već pobrinula rent-a-car tvrtka, tako da autoput i trajekte možemo sasvim normalno koristiti bez kupnje vignete ili karata za trajekt, svih računi će na kraju doći rent-a-car tvrtki, koja će nam obračunati te troškove.

Nama su u rent-a-caru preporučili koristenje app-a „Elton“

App je strašno jednostavan za korištenje, potpuno je intuitivan i sve što trebamo napraviti je dodati kreditnu karticu kao način plaćanja

Map Stations Charge Route Profile

I to bi ustvari bilo sve 😊.

Kada želimo puniti automobil, potražimo punionicu u blizini

Map Stations Charge Route Profile

2

Odmah vidimo koja je brzina punionice: normalna, turbo, brza ili spora i od toga ovisi cijena punjenja. Zatim vidimo koliko je kilometara udaljena od nas i koliko ih ima slobodnih u tom trenutku. Kad se odlučimo za jednu od punionica kliknemo na nju, zatim kliknemo na „Go here“ i odaberemo kojom navigacijom želimo stići do punionice 

Kad smo stigli, priključimo auto na punionicu i na app-u kliknemo na „Charge“

Punjenje u svakom trenutku možemo prekinuti klikom na „Stop charging“ i možemo provjeriti račun i iznos koji nam je skinut s kreditne kartice.

U Norveškoj gotovo svaki hotel ima svoje punionice, na koje možemo priključiti svoj auto na punjenje i tada je najčešće potrebno scanirati QR code kako bismo uključili punjenje

To bi u biti bila cijela mudrost. Osim što u ovom app-u možemo tražiti punionice u blizini ili u jednom određenom gradu, ako želimo isplanirati dulje putovanje, navigacija u autu nam uvijek pokazuje gdje se nalaze punionice, a one su u Norveškoj doista na svakom koraku - u hotelima, shopping centrima, na parkiralištima, benzinskim crpkama...
